M&G DuraVent & Security Chimneys to Exhibit at the Modern Hydronics Summit 2015

July 10, 2015

The Modern Hydronics Summit will be taking place September 10th at The International Centre in Mississauga, Ontario.

As Canada's only hydronic-exclusive event, Modern Hydronics Summit, is a one-of-a-kind conference and trade show featuring demonstrations of the latest technologies and a host of informative, high profile speakers from HPAC and HVAC. This is the perfect forum for sharing ideas, networking and soliciting advice from top experts representing many of the leading manufacturers in the industry.

We will be showcasing DuraVent's **PolyPro® Cascade** system, the most versatile system for venting boiler and tankless water heater appliances, this robust system is easily configured for most any cascade layout of condensing appliances. The modular system consists of an extensive set of components allowing construction of a cascade vent system, in no-time.

Another exciting product line of focus will be Security Chimney's **SecureSeal®**. The Secure Seal flue is manufactured from AL29-4C, a super-ferritic stainless steel designed for extreme resistance to chloride ion pitting, crevice corrosion and stress corrosion cracking, as well as general corrosion in oxidizing and moderately reducing environments. AL29-4C is the ideal choice for withstanding the harmful effects of corrosive condensates.

Be sure to visit us at our booth to learn more about our new innovations and product developments.

About M&G DuraVent

M&G DuraVent is a recognized technological leader in the venting industry. All M&G companies, including DuraVent, exclusively develop, manufacture and market a wide range of flue and vent products in aluminum, stainless steel and plastic for the HVAC and hearth industry. M&G is the largest supplier of engineered venting systems for the high-efficiency heating market in Europe for 20 years. For more information, please visit www.duravent.com.
